RETECFLEX - the universal tool for renovation and modernization

- VR microprocessor control: speed selection, tachogenerator constant speed control, soft start, restart protection after power failure, overload protection and temperature monitoring
- Motor: powerful, strong motor for quick working progress
- With damping element between spindle and tool being used: this reduces vibration, aids for smooth running, improves guidance and increases the service life of the machine
- Completely cast electronic components prevents damage due to metal dust. The 3-fold winding protection reduces motor wear, increases service life
- Special gearbox: special gear ratio for high torque in the medium and low speed range
- Dust-proof on/off switch
- Effective dust extraction thanks to a large extraction cross-section. Simple, rapid connection using the FLEX clip system. No adapters or reducing sleeves are required
- Vacuum guard: with stepless height adjustment
- Universal tool system can be adapted for a large number of renovation and modernisation applications. Compact, handy and ideal for working on small surfaces and on the edges of larger areas
- Spindle lock
- Complete with 12 pointed tungsten carbide scouring discs. For removing hard plaster, concrete, foam backing and adhesive residues, paint on plaster, epoxy plaster, flexible protective coatings, plaster on wooden beams and latex/oil paints on plaster.
