Laser measuring technology

ALC 311

Order no. 311.286

| Technical attributes | ALC 311 |
|----------------------|-------------|
| Precision | ± 3 mm/10 m |
| Self-levelling range | ± 3,5 ° |
| Operation duration | 15 h |
| Visible laser diodes | 3 x 635 nm |
| Max. working range | 20 m |
| Laser class | 2M |
| Weight | 0,7 kg |

| Standard equipment | |
|---|----------|
| Wall and tripod console | 1 piece |
| Magnetic target panel | 315.281 |
| Laser goggles | 312.134 |
| Batteries 1,5 V (AA) for measuring device | 3 pieces |
| Padded carrying bag | 1 piece |

Self-levelling cross-hair laser

- Three visible, individually switchable laser lines
- Cross-laser projection
- Vertical line 90° to cross laser
- Self-levelling with robust magnetic damping
- Optical and acoustical warning signal when self-levelling range is exceeded
- Transportation lock
- Ideal for interior finishing: suspended ceilings, aligning metal studs in drywall construction, fitting doors and windows, transferring heights, levelling tiles, flush fittings, etc.
